

Education

Ramaiah Institute of Technology, Bengaluru
B.E in Computer Science Engineering

August 2024 - May 2028
CGPA: 9.44/10.00

Skills

Languages & core: Java, Python, C, JavaScript, TypeScript

Frameworks & libraries: Spring Boot, JPA, REST API, Next.js, React, Zustand, Framer Motion

Web: HTML, CSS, Tailwind CSS, WebSockets,

Tools: Git, GenAI tools, MySQL

Experience

TakeUForward (TUF) | AI Education Content Intern

July 2026 - Present

- Leverage AI-assisted production workflows (including Claude, ElevenLabs, and Hyperframes) to build comprehensive placement aptitude preparation courses.
 - Break down complex quantitative and logical reasoning concepts into highly structured, step-by-step video modules, focusing on core problem-solving methodologies for campus recruitment.
 - Maintain a rigorous volume pace, ensuring precise analytical accuracy and high-quality content delivery for a platform serving a massive student audience.
-

Projects

DEMOS – Interactive OS Concepts Simulator

- Built all 4 OS modules from scratch: **CPU scheduling** (FCFS, SJF, SRTF, Round Robin, Priority), **memory/paging** (FIFO, LRU, Optimal, TLB, address translation), **concurrency** (Banker's Algorithm, Dining Philosophers, mutex/semaphore), and **disk I/O** (SCAN, C-SCAN, LOOK, C-LOOK) with live **Gantt charts** and step-by-step execution
- Being adopted by 4 faculty as **official teaching tool** across multiple sections; rolling out to junior batches from next semester

SchemaLenz – Database Schema Analysis & Visualization Tool

- Full-stack tool that **visualizes the complete data journey**: input a flat file and a set of functional dependencies → get normalized schema (1NF through BCNF) with step-by-step decomposition, attribute closure, candidate key detection, and minimal cover computation
- Includes **B+ tree index builder** and heuristic SQL **query optimizer** with selection pushdown

ADEO – Multi-Agent Disaster Evacuation Orchestration (*Unisys UIP*)

- Built **vulnerability agent** (risk scoring by zone based on elderly population, hospital and shelter availability), Bengaluru city model using real **OSM road network**, and full frontend dashboard with real-time **WebSocket log streaming from agents**
 - **3-agent system** (Vulnerability, Mobility, Decision Governor) dynamically reroutes evacuation paths on flood-simulated edge removal on real Bengaluru road graph; shortlisted for Unisys UIP Phase 1 evaluation
-

Achievements

- **Winner, Innovex AI'25** — Model output drift detection
- Top 24 among 500+ teams nationwide in **Unisys Innovation Programme (UIP17)**
- **Infosys STEM Stars, 2024**— Selected among 10,000+ applicants based on merit and profile
- **Winner, SIH College Internal Rounds**— BinVision waste segregator (IoT)
- **Runner-Up, Technologia**— AI based game development contest
